◆ Application of Guar Gum Powder in Different Industries

- 1). Suspending Agent in beverages
- 2). Manufacturing of medicine
- 3). Manufacturing of Paper, Crafts
- 4). Textile Industry
- 5). Cosmetic Sector

1). Suspending Agent in beverages

The sedimentation rate is slowed down by increasing the viscosity of liquid vehicle, and slowing down settling in accordance to stokes law.

2). Manufacturing of Medicine

It is also widely being used in pharmaceutical industry as a binding & disintegrating agent in manufacturing of tablets.

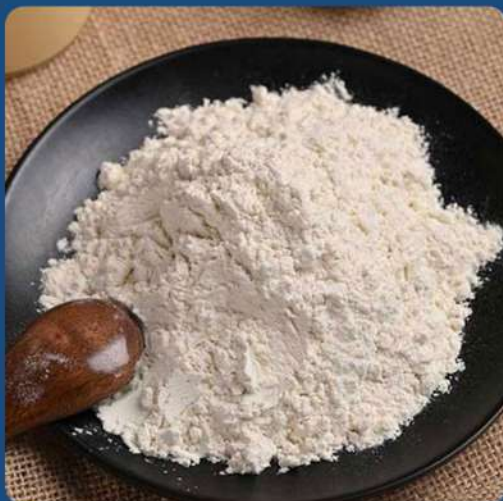

3). Manufacturing of Paper, Crafts

In the textile industry it is also used in silk, rayon, cotton in order to increase the strength of the wrap and reduce the dusting of the sizing machine.

♦ Advantages of Guar Gum India

- 1).It possesses double the ability to thicken than flour and almost eight times that of the corn starch powder.
- 2).Its usage avoids the formation of any lump and does not break down easily like the corn starch. It eliminates the need for heat to thicken and can get to hydrate itself very quickly.
- 3).Experts suggest the appropriate ratio which works well with Ethylene Oxide free guar gum manufacturers as an excess of it may form lumps in the whole recipe.
- 4).Almost Seventy Percent of the food industry applications of the fast-paced industries use the guar gum powder due to its varied and multiple benefits. It is also expected to grow exponentially looking at the current demand scenario.

- ♦ Guar gum powder is odourless, having dissolving capacity in cold and hot water and making high viscosity paste.
- ♦ Guar gum powder viscosity is based on various factors like concentration, temperature and time.
- ♦ Today, guar gum is taken best substitute for corn starch or flour worldwide and it is widely accepted by food industries too.

◆ Medicinal Properties of Guar Gum Powder

- 1).Its healing properties are ideal to cure snakebites and boost the vision and power of the eyes.
- 2).The inherent anti-bacterial properties can fight skin diseases like fungal infections and ringworms.
- 3).If toddlers face the constipation problem along with fever and cold this remedial measure can be started immediately. It also helps to manage teething issues in children It has potential health maintenance capacities and can fight against typhoid effectively.
