

# UBA INTERNATIONAL

Trading tradition across the world

## About Us

We are a thriving Export-Import company in the field of coconut products. We aim to export the essence of the finest quality coconut products worldwide in their most authentic form.

We also take pride in utilizing every part of the coconut to produce a diverse range of products, creating a sustainable approach to our business and ensuring nothing goes to waste. Whether you are a start-up or an established firm we provide the utmost customer satisfaction and reliable customer service standards.

## Why UBA International?

- **Top-notch quality products.**

UBA International sources its products from the most authentic areas. We also inspect every step of the process to ensure that our customer receives the best version of our products. Hence UBA International promises high caliber products in every situation.

- **Voila! Our government supports us and farmers.**

We are an India-based company and our government encourages us to its fullest through our technology mission on coconut (TMoc) and coconut development board (CDB) which helps us reach the best of the farmers in the most efficient way possible.

- **No worries, we are a well-certified company.**

We have all the necessary certificates such as, CDB-RCMC, APEDA, FSSAI, UDYAM, Start-up India, GST and ESIC. Hence we leave no chance of any sort of hindrance in our deals.

- **We leave no wastage.**

Coconut as one of the ten key plants for climate adaptability and one of the top five for carbon sequestration. we use all parts of coconut hence we ensure sustainability of ecosystem

## What do we sell?

We use all the parts of coconut and form variable products such as

- Fresh coconut
- Coconut oil
- Dry coconut
- Copra meal cake
- Desiccated coconut
- Coconut shell charcoal

## What does this product contain?

### Fresh Coconut

- It also known as fully/semi husked coconut
- It could be a very healthy addition to your diet. It's already a part of our religious traditions and hence also has made its way to our recipes.
- Coconut coir can be used for making various types of furniture products and used as an organic & decorative component in agriculture and horticulture

Standards	Percentage
Carbohydrate	15% - 20%
Protein	9%
Crude Fiber	4% - 10%
Fat	65% - 68%

## Dry Coconut

- It is primarily used to extract coconut oil while edible grade of copra is consumed as a dryfruit and used for religious purposes.
- It can be manufactured using sun drying.
- Dry coconut contains lauric acid, which may contribute to heart health by increasing good HDL cholesterol levels.

## Desiccated Coconut

- Desiccated coconut is a white kernel part of the coconut. It's dried and disintegrated to the perfect moisture content to give a mouth-watering taste that it possesses.
- It Can be used in snack, in backed goods and in Savory dishes

Standards	Percentage
Moisture	1.3% - 2.5%
Oil Content	65% - 68%
Protein	6.00% - 6.61%
Crude Fiber	4% - 6%
Carbohydrates	15% - 20%

## Coconut Oil

- Coconut oil has nourished many generations of India. Right from the temple to the kitchen, to the secret book of beautiful hair, it has marked its presence in our Indian lifestyle.
- Coconut oil can be used as a base in natural deodorants

Standards	Percentage
Moisture	0.25%
Acid Value	<1%
Iodine Value	7.5% - 10.5%

## Copra Meal Cake

- It is an end-product in the production of coconut oil from copra, which is the dried meat of a coconut.
- This coconut meal is commonly used as a valuable feed for various animals of cattle, poultry, and other grass-fed animals. It is basically used as a protein supplement that is alone or mixed with other protein sources.

Standards	Percentage
Moisture	8% - 12%
Color	White

## Coconut Shell Charcoal

- It is a charcoal made from the coconut shell that is heated at more than 100 degrees Celsius without the presence of oxygen.
- Coconut shell charcoal is an odorless and non-toxic cleaning agent. It is a powerful deodorizer and decolorizer, hence also used in many air conditioning industries, cosmetic industries, and purification plants as well.

Standards	Percentage
